This Review Article is brought to you for free and open access by the School of Environmental Science at UI Scholars Hub. It has been accepted for inclusion in Journal of Environmental Science and Sustainable Development by an authorized editor of UI Scholars Hub.

## PREFACE

The development of the world demands changes in the environment from time to time, and this condition can not be avoided, for that the academic world is required to always be ready and watchful for this condition. This challenge makes the Journal of Environmental Science and Sustainable Development (JESSD) continue to be consistent with the focus of environmental studies until now. Starting with the inaugural edition in 2018, JESSD continues to be aware and focus on environmental studies and sustainable development in developing countries, especially for Southeast Asia countries.

In this issue of Volume 2 Issue 1, we present eight scientific articles from various parties, with various studies on the environment and sustainable development. The authors of these eight articles came from various universities namely Kyoto University (Kyoto, Japan), Musamus University (Merauke), Bogor Agriculture University (Bogor), Universitas Pelita Harapan (Tangerang), and Universitas Indonesia (Jakarta); and from one of the government agencies, that is The Geospatial Information Agency (Cibinong, West Java).

The eight articles consist of studies of oil spills, conservation of water resources, monitoring of tropical peat ecosystems, fractionation of soil microelements related to soil profile of forest areas, municipal solid waste studies, polycentric waste management systems, impact of digital fabrication in architectural designs that affect the environment, as well as efforts to utilize solid waste. We hope, the variety of publications in our journal can contribute to the review of scientific information, and its development in the future. The readers can access all articles through the link <http://jessd.ui.ac.id/issue/2>. Moreover, through this, we invite academics, practitioners, and even stakeholders to be able to enrich the repertoire of environmental studies by sending their writings to our editorial team for the next edition.

This issue also cannot be separated from various parties who helped, for that we would like to express our sincere thanks to the entire team of editors and reviewers who have taken the time, mind and energy to jointly manage this journal, and also to the website management team, Indonesian journal volunteers, and KPPRI (Office of Research and Innovation Product Management) at the Universitas Indonesia for all their assistance in technical matters that we must go through. Besides that, also our thanks to the School of Environmental Sciences, Universitas Indonesia, for continuing to support our work. Finally, enjoy exploring, and let us together add to the repertoire of our knowledge by sharing.

Herdis Herdiansyah

## TABLE OF CONTENTS

i	Cover
ii	Preface
iii	Table of Contents
iv	Acknowledgments
1–14	OIL SPILL RESPONSE PREPAREDNESS MODEL THROUGH COMMUNITY PARTICIPATION IN TELUK PENYU BEACH, CILACAP REGENCY <i>Tri Edhi Budhi Soesilo, Chiquita Tri Rezki, and Ihya Sulthonuddin</i>
15–25	TRANSITION OF PRIMARY FOREST TO SECONDARY FOREST AND THE IMPACT FOR WATER RESOURCES CONSERVATION <i>Mahawan Karuniasa and Priyaji Agung Pambudi</i>
26–47	ENVIRONMENTAL IMPACT ON DIGITAL ERA BY ARCHITECTURAL PRODUCTION <i>Reza Sandi</i>
48–60	MODULAR FURNITURE MADE FROM CORRUGATED BOX WASTE USING DESIGN FOR ENVIRONMENT GUIDELINES <i>Natalia Hartono</i>
61–74	A POLYCENTRIC WASTE MANAGEMENT SYSTEM IN THE KATHMANDU VALLEY, NEPAL <i>Sanae Ito</i>
75–96	SPATIOTEMPORAL ANALYSIS IN MONITORING LANDSCAPE DYNAMIC PATTERNS IN TROPICAL PEAT ECOSYSTEM (STUDY IN TEBING TINGGI ISLAND, RIAU, INDONESIA) <i>Dheny Sampurno</i>
97–116	A QUANTITATIVE DYNAMIC MODEL FOR MANAGING LITTER ABUNDANCE IN THE TRASH TRAP OF AN URBAN LAKE IN INDONESIA <i>Muhammad Muhsin and Herr Soeryantono</i>
117–126	FRACTIONATION OF IRON (Fe) AND MANGANESE (Mn) IN THE HORIZONS OF FOREST SOILS, AGROFORESTRY, AND DRYLAND AGRICULTURE <i>Parjono, Syaiful Anwar, Kukuh Murtalaksono, and Lilik Indriyati</i>

## **ACKNOWLEDGMENTS**

The Journal of Environmental Science and Sustainable Development (JESSD) is proudly published by School of Environmental Science of Universitas Indonesia, and supported by the Research and Innovation Management Product Office (KPPRI) of Universitas Indonesia. Moreover, the journal will not be completed without the reviewers who have fully and seriously committed to the peer review process. Only because of their contribution, JESSD have successfully published this edition with high-qualified papers.
